

## Detail of Project

<b>Project</b>	Special Assistance for Project Sustainability (SAPS) (for Cagayan de Oro City Water District) for Provincial Cities Water Supply Project Phase III
<b>Location</b>	Cagayan de Oro (Philippines)
<b>Duration</b>	April - December, 2014
<b>Funding Agency</b>	Japan International Cooperation Agency (JICA)
<b>Client</b>	Cagayan de Oro City Water District (COWD)
<b>JV</b>	-

Cagayan de Oro City is a port city located in the northern part of Mindanao and is one of the cities heavily damaged by Tropical Storm "Sendong". JICA, COWD (Cagayan de Oro city Water District) and LWUA (Local Water Utilities Administration) conducted the Rehabilitation Project. Though after being carried out the project, NRW rate of COWD is still high (54%).

The objectives of this project are: (1) to confirm current state of NRW of COWD; (2) to investigate technical, institutional arrangement and financial situation of COWD's current NRW reduction activities; (3) to identify problems and challenges of current activities; and (4) to formulate and address recommendations and appropriate measures with each issue.

**82 water meters branched Stub-Out**

**Leak Survey**

**Water Meter Error Testing**

**Flow Meter Accuracy Measurement**
